 Cutler-Hammer Push Button Switch, conveniently located in upper part of grip
 Equipped with Jacob's Chuck
 Price, complete with 10 foot cord, \$42.00, list

Mighty Handy for Jobs Like This

Installing a clock on a metal dash is a "cinch" with this handy little $3\frac{3}{4}$ pound Hole Shooter. You won't even work up a sweat!

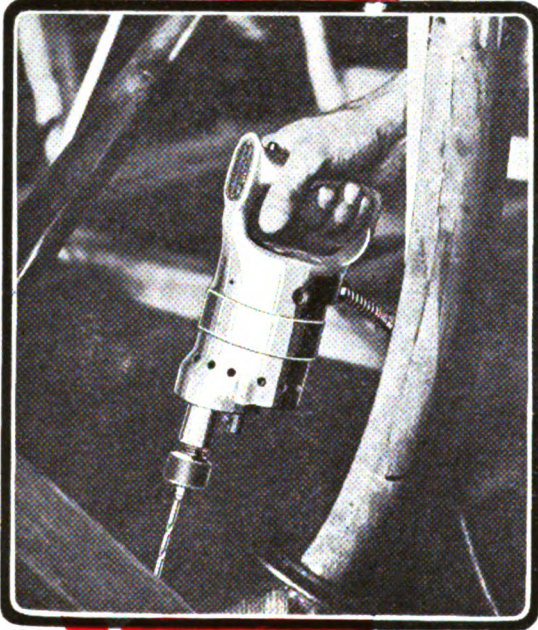

Work like this is just what the Hole Shooter was designed for—light jobs where speed is essential, and jobs you can't get to with a hand tool or a bulky, 8 or 10 pound power drill. And it sure is easy on your wrist!

Handiest tool you ever saw for installing hardware, attaching small accessories, trim and body work. A guaranteed, standardized drill—built for hard service by a master tool maker. Light because it's designed right—aluminum-cased—beautifully made. Will stand up long after heavier, higher-priced drills have given out.

Put a Hole Shooter on the job. To save time, order direct from factory—naming your jobber. Literature on request.

Making Life Easier for the Body Builder

DRILLING screw holes in body sill braces is but another of the many "Hole Shooter jobs" that have won over garagemen, trimmers, body builders and repairmen in a score of trades to this husky little, high-speed drill. Weighs only $3\frac{3}{4}$ pounds. Does faster, more accurate work and is far easier on the workman's wrist. Fewer broken drill points, too.

SPECIFICATIONS

Capacity, 0 to $\frac{1}{4}$ " in steel and wood.

Weight, $3\frac{3}{4}$ pounds.

Motor, Universal type; Speed, 1600 r.p.m.; 110 or 220 volt.

All parts interchangeable.

Centrifugal Fan keeps motor cool.

Cutler - Hammer Push - Button Switch, conveniently located in upper part of grip.

Equipped with Jacob's Chuck.

Price, complete with 10-foot cord, \$42.00, list.

For trim and body work, for attaching hinges, locks and other hardware, for dashboard drilling and installing small accessories, there is no handier tool than the compact, light-weight Hole Shooter.

Built by a master toolmaker, this guaranteed, standardized drill is the natural result of correct design and expert workmanship. Light weight because it's aluminum cased; longer lived because it's made better. Outlasts heavier, bulkier drills that cost much more.

Put a Hole Shooter to work in your shop. To save time, order direct from factory, naming your jobber

Speeding Up Awkward Drilling Jobs

How much quicker it is to "shoot" these screw-holes in the glued top-framing of a limousine body with the 4 pound Hole Shooter than with a bulky 8 to 10 pound power drill or a hand tool. And it's a lot easier on your workman's wrist, too.

And so it is with scores of small drilling jobs that confront the garageman, body builder and trimmer every day. For installing accessories, for attaching locks, hinges and other hardware and for dashboard work, this portable electric drill is the handiest tool made.

Workmen swear by the Hole Shooter, because it is so compact and light in weight. Does faster, more accurate work. Effects a big saving in drill points, too.

A guaranteed, standardized tool built by a master toolmaker. Designed right—light weight, but durably made. Properly balanced. Outlasts drills weighing twice as much and costing 50 per cent more.

Give the Hole Shooter a try-out. To save time, order direct from factory, naming your jobber. Literature on request.
